TURN UP a nostalgic meeting

The wheels are turning, the chains are creaking; energy is going to be translated into toil. In an heroic way they actors face the risks of every single moment, balancing on the borders of their capacity. Never ending cooperation, production and inspection, dynamics in every detail. Fighting against the elements, in extreme concentration striving for the required perfection.

TURN UP is a non spoken improvisation of various scenes, movements and effects. In a setting of tackles, winches, wheels, cables and pulleys the hard working men are busy doing their jobs. They symbolise the labour, energetic power, joy and cooperation. Because of the simplicity of its construction, its colours and natural look, Turn Up will be associated with the good old days.

Turn Up

Play : 3 actors

- 3 shows of 30 minutes in between 4 hours
- pauses of at least 30 minutes between the sets
